Education

University of Lagos Lagos, Nigeria.
Bachelor of Science in Mechanical Engineering *January 2020 – August 2026*

- Relevant Coursework: Mathematics, Physics, Electronics,Software Engineering, Data Structures & Algorithms, OOP.

Skills

Languages: Python, JavaScript, TypeScript, Java
Frameworks: React(Next.js), Node.js(Express), Spring Boot
Developer Tools: Git, Jira, Linux, Jest, Vitest
Database: MySQL, MongoDB, PostgreSQL, Redis.
CI/CD: GitHub Actions, Docker

Experience

Frontend developer July 2025 – June 2026
City-distro *Nigeria*

- Built an internal admin panel for managing orders, inventory, and supply-chain operations.
- Handled data at scale across 50+ retailers, 1,000+ inventory items, 15+ manufacturers, and 500+ orders, using caching to keep operations seamless and support informed decision-making.
- Developed 12 new backend API endpoints and improved existing ones to support product and operational needs.
- Designed the database schema and data structures from product requirements using PostgreSQL, ensuring scalable and consistent data storage.
- Improved server response time by 70% by caching frequently accessed data with Redis, enhancing overall application performance.

Web instructor August 2024 – April 2025
Dimplat tech *Nigeria*

- Taught HTML, CSS, Javascript, React.js, Node.js and, guides students to deploy production apps.
- Mentored 20+ students, providing code reviews and project feedback to accelerate job readiness.

Junior Frontend developer February 2023 – March 2024
Midrohub *Nigeria*

- Developed and implemented 4+ responsive websites with interactive user interfaces, achieving 90+ PageSpeed performance ratings.
- Collaborated closely with the team to translate wireframes and visual designs into intuitive and interactive web interfaces and ensure peak performance of web applications.
- Utilised modern javascript framework (React) to build dynamic and scalable web applications.
- Conducted thorough testing and debugging to ensure seamless functionality across browsers and devices.

Projects

AI Language Translator Web App November 2025

- Designed and built an AI-powered language translator web app, integrating OpenAI's API to deliver real-time multilingual translation.

Engineering Computation Toolkit (Python) January 2024

- Used NumPy to solve continuum mechanics equations obtained from mathematical modelling and Matplotlib to plot the corresponding graphs.

Devlinks August 2024 – October 2024
Link

- A web application for aggregating and sharing links from multiple platforms with a single link.
- Built using React.js and Node.js.
- Designed the database schema (tables and relationships) and data structures using MongoDB to support efficient data retrieval and storage.
- Implemented user authentication, dashboards, and CRUD features.
- Created RESTful APIs for smooth data handling and better performance.
- Deployed the frontend on Vercel and the backend on Render.

Volunteer Experience

Frontend developer June 2023 – January 2024
Afren *Nigeria*

- Proactively contributed as a front-end developer to build a captivating waitlist landing page that converted 60% of visitors into registered users.
- Brought the company's vision to life through thoughtful design, seamless user experience, and intuitive interface.
